See Summary of Record of Interview requirements on reverse side or on attached sheet.

/Tuan A Vu/
Examiner, Art Unit 2193

Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: the discussion was to expand the limitation as "buffering" of "application state file" within a receiving user (e.g. in the independent claims) such that the buffering supports delay and selective loading of accepted (or non-rejected) state files by such user into the user design or session; that is, the buffered design state data coming from concurrent collaborating users to be subjected in a delayed manner within the receiving user for user determination if such data is fit for the user's aspect of the design; the buffering to enhance the shared design state endeavor effectuated via communication of data among concurrent users performing each one aspect of the collaborative design via state file passing paradigm. The agreed upon language to effectuate the buffering limitation as proposed in the discussion was utilized as basis for an Examiner's Amendment.

DETAILED ACTION

1. This action is responsive to the Applicant's response filed 7/31/09.

As indicated in Applicant's response, claims 1, 17, 23-24, 26 have been amended.

Claims 1-7, 9-12, 17-31 are pending in the office action.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Brian Landry for Ralph Loren, Reg. # 29,325 on 9/26-09/28/09

The application has been amended as follows.

In the **CLAIMS**:

The claims have been amended according to the herein attached Amendment, namely, "Supplemental Claim Amendments for Enabling Examiners' Amendment", provided as file "AmendM_092809.pdf"

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

4. Claims 1-7, 9-12, 17-29 are allowed.

The following is an examiner's statement of reasons for allowance.

The prior art taken separately or jointly does not suggest or teach the following features.

A method for collaborating over the NW a design of electrical or mechanical assemblies using heterogeneous user applications comprising

(i) client session with sharing of control messages with other session client processes and creating of application state file representing application state of the design, where manipulating of said design includes:

presenting the first application state file created by another user on another local application to a user of the session client process to allow the user to refuse or delay loading of the first application state file; and

(ii) if the user applies to delay loading of the first application state file:

buffering the first application state file at the application layer to allow the user to incorporate the buffered first application state file into the design data at a later user-determined time; and loading the first application state file created by the other users on the other local applications at a time determined by the user of the session client process;-

(iii) wherein the buffering of incoming application state files enables the user of the client process to selectively apply other users' changes to the design, thereby allowing the user of the session client process to manipulate a first aspect of the design before loading changes made to a second aspect of the design by the other users within the other users' respective local applications;

and this "buffering" for delay approach is conveyed in claims 1, 11, 17, 22-24, 26.

Notani (USPN: 6,567,783) in light of **Thackston**, USPN: 6,928,396 does not teach or suggest 'buffering' of application state files regarding design data (i.e. design of electrical or mechanical assemblies) based on incoming of state files (or control messages) from concurrent collaborating users to effectuate or manipulate a given aspect of the design approach which is implemented via shared application/design and heterogeneous client users, each developing individual aspect of the design; where each session-specific user can create a state application file to be communicated as (control) state data to other clients, and as these state files are buffered into one receiving user, the user can choose to delay incorporation of the buffered application state data into that user's instance or aspect of the design until a user-determined time at which, any non-refused state data from heterogeneous collaborating sessions will be loaded,

whereby the user can manipulate his aspect of the design based on the desired state file from other users, as set forth in (i) (ii) and (iii).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
